

Laboratory Module 6

Problem 1) Develop an asp.net page that displays a list of options with check boxes (Use CheckBoxList web control).

On clicking a button (web control) the page displays the selected options in a label control.

Problem 2) Develop a page that displays two text boxes and a button web control. The textboxes are used to capture number of rows and number of columns from user.

(a) On clicking button, generate a table with r rows and c columns. In each cell display row,col values.

(b) Optionally add features of border and image in each cell.

Problem 3) Develop a web form that records all page processing events in a list box as shown below.
